

First Screening

Computer poems bpNichol, 1984

The work

A suite of a dozen programmed, kinetic poems written by the Canadian poet bpNichol on an Apple IIe in Applesoft BASIC, 1983-84. Issued by Underwhich Editions as 100 numbered, signed copies on 5.25 inch floppy disk with printed matter. A landmark of kinetic / computational poetry poems that move, erase, and rewrite themselves on screen.

This file

The complete original Applesoft BASIC source of First Screening bpNichol's own code, not a reconstruction. The listing carries his COPYRIGHT 1984 line and names each poem in REM comments (ISLAND, LETTER, REVERIE, CONSTRUCTION, POEM FOR MY FATHER, and the final hidden poem).

Provenance

Preserved, documented and ported in 2007 by Jim Andrews, Geof Huth, Lionel Kearns, Marko Niemi and Dan Waber, and published at vispo.com/bp. Source listing archived from that project.

Held with

the collection's other computational poetry code (the House of Dust reconstruction) and concrete/computer poetry holdings. A physical signed Underwhich floppy or the 1993 Aleator Press edition remains on the hunt list.
