Preface

Did you ever leaf through a magazine without stopping to look at the cartoons? Not many people do. Indeed, some sociologists feel that cartoons are one of the major influences on public opinion. I don't know if I'd go that far, however, I would not argue with the notion that many laypeople get their information about computers exclusively from sensationalist news stories and from cartoons. And just where do the cartoonists get their ideas? No one knows for sure, but it's fairly clear that the cartoonists are, for the most part, outsiders looking into the field of computers. And this look is generally through a peephole or dirty periscope.

So we probably won't get any profound knowledge about the world of computers from cartoons but that's not the object of cartoons anyway. Besides, it's the incongruous, the unexpected, and the surprise connection that makes a situation funny. And there are several hundred of these fresh creative leaps of the imagination in this book.

Ron Anderson, a sociologist at the University of Minnesota, feels that computer cartoons can be grouped into six categories:

1. Humanized computer
2. Computerized human
3. Computer as a beneficial tool
4. Tool evolves into threatening master
5. The dependent computer
6. Computer people and insider jokes

I don't argue with these categories since Ron has studied the subject far more deeply than I have. However, to lend this book some slight degree of organization (many computer people have this must-be-organized phobia), I found it easier to use a somewhat different group of categories from computer dating to computers in the office and so on.

If you read this far, you probably shouldn't have bought this book. The whole purpose of the book is to read the cartoons and laugh or chuckle or giggle or groan. Who ever heard of a preface in a cartoon book anyway? Let's get on with it and have a little cybernetic fun!

May 1977, Morristown, NJ

LIFELONG LAUGHLINES ...

"Mr. Hewit, This is your life..."

RAY CRUSE

"Must you always bring your work home with you?"

CINDY RAY

"I got rid of my computer today, when I decided it could replace me!"

Paine

"This isn't quite what I had in mind when I said I'd like to be a game show contestant on T.V.!"

"I'd like a word with your computer."

"I just can't decide which computer is best for me."

"The nerve of them, taking the word of their computer against my pocket calculator!"

"Computer, Computer on my wall Who's the fairest of them all?"

"Charlie! Where do you want the computer?"

"Mrs. Jones, you have had a most unusual baby!"

"Wow! The centerfold this month is the new IBM Triplex 304!"

"Didn't I warn you it would lead to this? First your boss asks you to bring home a little book work, then typing, then a few reports to write up..."

"Poor Harold! He spent hours assembling an electronic songbird and our cat ate it!"

"As you can see, we've programmed the MARK VII with a rather refreshing sense of humor."

"Well Captain Johnson, do you think you can tear yourself away from your galactic conquests long enough to take out the garbage?"

"It's worse than I expected. I've been replaced by a pocket calculator."

"You think you've got problems with a heat sink!"

"Can't you forget business for a day or two?"

"At that distance and location your ball will break sharply to the right it concludes with 'Lots of Luck!'"

COMPUTING
EXCLUSIVE!

SPANOVISION

BETWEEN 1975 AND 1985 THE DIVISION BETWEEN TECHNOLOGY AND THE PUBLIC GREW IMMENSELY. COMPUTER RELIANCE INCREASED WITH THE POPULATION, AND THE INTRUSION OF MACHINE IN HUMAN AFFAIRS DREW GREATER NEGATIVE REACTION THAN ANTICIPATED. THE HEIGHT CAME IN 1985 WHEN A COMPUTER ERRONEOUSLY SCHEDULED NINE MILLION RESERVATIONS IN YELLOWSTONE PARK, CAUSING THE GREAT CAMPER WARS.

GET A FIX
ON THE
WINNEBAGO.

1986- PUBLIC OPINION OF COMPUTERS REVERSES WHEN THE COMPUTRON-HOLOGRAPHIC DISCOVERIES GIVE BIRTH TO THE HOLOGRAPHIC AGE. EVERYTHING FROM FLOW CHARTS TO EPIC FIFTH FORM MOVIES CALM AN ENTHRALLED AND AND BETTER INFORMED MASS POPULACE.

BUT CHARLATANS
ARE NEVER FAR
BEHIND!

OPPORTUNISTS RUN AMOK...

CUITS AROUND...

SOCIETY NEARS OVERLOAD.

IN THE CONFUSION OF INFORMATIONAL GLUT, AMERICANS WHO HAD BEEN ESSENTIALLY LEADERLESS FOR DECADES ARE OVERWHELMED BY THE COMPLEXITY OF THEIR SITUATION.

BUT AS FATE FALLS, OUT OF THE QUAGMIRE OF COMMERCIAL ENTERPRISE AN INVENTION COMES TO THE RESCUE...

WHAT INVENTION COULD CAUSE SUCH A STOCK MARKET SENSATION?
WHAT DEVICE COULD MAKE POLITICIANS HONEST?
WHAT MIRACLE COULD MAKE TELEVISION FUN TO WATCH?

* FINAL PRINTOUT
NEXT ISSUE *

WHAT GALL.

CREATIVE
COMPUTING
EXCLUSIVE!

SPANOVISION

What suspense! Last issue, the massive machinations of Span-O-Vision produced its first VIS-U-COMP rendition, conjuring an unnerving scenario in which computers are nearly rejected en masse by an enraged society, only to rescue themselves with an astounding shift of focus! From the irritation of much misuse and quackery, commercial computer technology develops a pearl:

The Val-U-Graph Generator!

This device enables a home viewer to perceive when someone on T.V. is telling the truth! A special PSYCHOLOGICAL STRESS EVALUATOR UNIT reads variances in voice frequencies, determines stress, computes, and signals when a person is fibbing! Feb. 1987- Panicked legislators rush a bill through Congress prohibiting its use in legal proceedings and bans direct judgement of utterances on T.V.

Undaunted, commercial interests and T.V. industry backers devise a prime-time series in which politicians are invited to debate. Computers are programmed with all pertinent information. The debator's voices are fed into the PS Evaluator, and converted into graphic images, colors, and simultaneous electronic soundtrack based on voice frequency modulations!

It is then the task of viewers to debate the credibility of the speakers from evidence within those images (by predetermined criteria)

AND NATURALLY, IF I AM ELECTED, I CAN ASSURE THE AMERICAN PUBLIC....

...THAT THEY WILL BECOME THE ULTIMATE FACTOR IN GOVERNMENTAL DECISIONS.

Gosh! But amazingly, there's more. The home viewer may then extract claims of politician, punch into home terminal linked to huge atomic-powered ENCYCLOTRON (a SPAN-O-VISION evolution) and receive a brief cinematic scenario immediately following said claim, along with its probability rating! Once again the world is safe for democracy.

"Feed that to the computer and see if it's a message,
or just a forest fire."

"I give up. I haven't won a hand all evening."

"You can start packing Ethyl ... My new cyborg is almost done."

"How did things go at the lab today Dear?"

CONCEPTUAL CHESS

THE CONCEPT: EACH GAME PLAYED WITH THIS SET-UP EVOLVES INTO A DIFFERENT DISPLAY OF IMAGE OCCURENCES THRU MODULATED SOUND AND COLORED LIGHT. EXAMPLE: PURPOSE OF ONE GAME COULD BE TO RECORD EMOTIVE SEQUENCE BY PRE-PROGRAMMED SOUNDS AS PLAYERS EXPERIENCE AGRESSION, FEAR, ANGER.

THE BOARD IS STANDARD SHAPE AND SIZE. EACH PIECE HAS ITS OWN CODED PLUG SET. AS EACH PIECE IS PLACED ON ANY SQUARE, IT LIGHTS UP, IN ITS OWN COLOR, THE PATH'S OF ALL ITS POTENTIAL MOVES. EACH PIECE'S LIGHT SET OPTICALLY OSCILATES, AT A SPEED DETERMINED FOR THAT PIECE, WHICH IN TURN CORRESPONDS TO PREDETERMINED MODULATED SOUND FROM EMS SYNTHESIZER SHOWN BELOW.

SQUARES MADE OF TWO THICKNESSES OF LUCITE.

UNDER SQUARE CIRCUIT

TRANSLUCENT LUCITE

AND EYES...

NOW I
CAN MAKE
IT...

DO ANYTHING...

... THAT I

WANT.

GRUB

THINK TANK

"I call them numbers, you can add them, subtract them, multiply them, divide them ... find their square root..."

"I didn't understand all that stuff he said between 'Good Morning, Class' and 'That concludes my lecture for today'."

"Why do I have to know math if I have a mini-pocket-calculator?"

"...No thanks, just scanning..."

"You're the Wizard of Oz?"

"But I thought the New Math was done by computers!"

"If it was mine, I'd pin-stripe and wax it!"

"... T12X31LC, this is A561205,LC4A ... I have to make pee pee..."

"We got the afternoon off: Our teacher's been recalled for repairs."

COMPUTER-EASE

"It makes the job of keeping tabs on everyone a lot easier."

"Of course, he wants something that won't fall apart first time he uses it."

"... We'd like to put two bucks on 'Happy Daddy' running in the seventh today..."

1970-

1980-

1990-

"To what do you owe your great wisdom and knowledge?"

"Looks like it might be a nice day tomorrow!"

"Yes, progress is wonderful. This little baby only set us back \$75,000.00 and we replaced a \$90-per-week clerk with it."

"Let's see now ... Have you had any previous experience with electricity?"

COMPUTER PROGRAMMING TRAINING CENTER

"Any other experience besides selling programs at the ball park?"

"You say you're an expert on computer technology?"

"The computer is guaranteed for fifty thousand miles or until it malfunctions ... whichever comes first."

"This is Mom."

"Not only does it give a more accurate reading than a crystal ball - it doesn't break into a thousand pieces when you drop it!"

"Thanks to advanced technology we can start treating you immediately ... for either one of five things!"

"Right Chief, we're running the suspects through the computer right now."

"He was a top programmer until he fed the machine everything he knew."

AMORÉ

POTPOURRI!

"Let's not rush things now, Miss Jablonski."

"To think I needed a computer to find you!"

MALE-A-PET
COMPUTER SERVICE

"I think I forgot to tell the computer that Bambi is a Great Dane."

"Cinderella and the Prince could have made it a whole lot easier on themselves if they'd used computer dating."

COMPUTA MATE 'N DATE

"Do you mind if I take her outside first and see how she looks in daylight?"

COMPUTER
DATING

COMPUTER
DATING

Randy
Hall

"Gee! my first computer date! I wonder what he'll be like?"

"What could I do? They said the computer never makes a mistake!"

SANDY'S DANDIES

"Yeah? Well, it doesn't make ME feel lowly and insignificant."

"Blast! Those kids have been monkeying with the circuitry again."

"See? It refuses to compute when the Bionic Woman is on..."

"I've got the Acme people on the line. They say they are sorry but your kit contained instructions for a KI-8 kit and you bought a KP-2 kit. They hope you have not been inconvenienced."

"We can't do business after all... my computer isn't speaking to your computer."

"Honey, were you saving this for anything special?"

"Do I remember what special day this is? Hmm... Of course! It's Norbert Wiener's birthday!"

COMPUTER SHOP

"Do you suppose my problem could be that I accidentally left them in my pocket and they ran through a complete wash and spin-dry cycle...?"

"To err is human. To really foul up a computer takes a man."

"Shhssh! Hold it... let's go someplace where we can be alone..."

ACME COMPUTERS

"He said he overheard two of our salesmen talking about the need for debugging..."

"Naw, I don't watch those bionic people TV shows. They're all a bunch of crock. Don't you agree, Ms. Ledbetter?"

AMUSEMENT PARK

"Get the programmer back here! He's crossed the merry-go-round with the rocket!"

"That does not compute. That does not compute.
That does..."

"Now hear this! I am the programmer. You are the programme!"

"What good is our new 50 million results per second
when our best operator is hunt and peck?"

ROUGHISH ROBOTS

{and other
super-heroes}

"See? The ex-14b is just as agile as any man."

"I compute therefore I am."

ELECTRONIC COMPONENTS

"Never mind the sack; I'll eat 'em here."

"My life has become a dull endless cycle of programming and reprogramming."

"DESTROY!"

"A box of CMOS please. He gets terrible migraines when he has to do intricate figuring."

PAY CRUSE

JOHNS' JOKES

"Uh ... about this loaner you sent us while our computer is being repaired..."

"How'd the production manager take it when you brought in all those specification changes, Burt?"

"Now, who are you going to believe... a forty year old mathematician or a two year old computer?"

"Let me begin by saying the computer was old and probably due to be replaced anyway."

"Our next speaker will talk on the subject of 'the pitfalls of electronic funds transfer systems'."

JOHNS

"C.J., find B.W. on the P.D.Q. and tell him two V.I.P.'s from I.B.M. and N.C.R. want to discuss the D.P.M.A. on the Q.T. with the E.D.P. and E.A.M. managers ... O.K.?"

JOHNS

"Johnson, I hear you don't trust our new computer-based environmental control system."

"That's the third paragraph you've started with 'according to our computer'."

JOHN

"Well, let's see if the front office thinks *THIS* one is simple enough to operate!"

ooo

ooo

JOHN

"What's wrong with his asking you for a date?...
He's only thirty-four."

"What do you think of that, Mr. Genius?!"

The diversity in *The Best of Creative Computing - Volume 1* can only be described as staggering. The book contains 328 pages of articles and fiction about computers, games that you can play with computers and calculators, hilarious cartoons, vivid graphics and comprehensive book reviews.

Authors range from Isaac Asimov to Sen. John Tunney of California; from Marian Goldeen, an eighth-grader in Palo Alto to Erik McWilliams of the National Science Foundation; and from Dr. Sema Marks of CUNY to Peter Payack, a small press poet. In all, over 170 authors are represented in over 200 individual articles, learning activities, games, reviews and stories.

This 328-page book has 108 pages of articles on computers in education, CAI, programming, and the computer impact on society; 10 pages of fiction and poetry including a fascinating story by Isaac Asimov about all the computers on earth linking up after a nuclear war to support the few remaining survivors; 15 pages of "Foolishness" including a cute cartoon piece - called "Why We're Losing Our War Against Computers"; 26 pages on "People, Places, and Things" including the popular feature "The Complete Computer Catalogue" which gives capsule reviews and lists sources for all kinds of computer-related goodies; 79 pages of learning activities, problems and puzzles; 29 pages continuing 18 computer games including a fantastic extended version of the single most popular computer game - Super Star Trek; and 32 pages of in-depth book and game reviews including Steve Gray's definitive review of 34 books on the Basic language.

The Best of Creative Computing - Volume 1 is available by mail for \$8.95 plus 75¢ postage from Creative Computing Press, Attn: Helen P.O. Box 789-M, Morristown, N.J. 07960.

The Best of creative computing

Volume 1 Edited by David H. Ahl

This fascinating 336-page book contains the best of the articles, fiction, foolishness, puzzles, programs, games, and reviews from Volume 2 issues of *Creative Computing* magazine. The contents are enormously diverse with something for everyone. Fifteen new computer games are described with complete listings and sample runs for each; 67 pages are devoted to puzzles, problems, programs, and things to actually do. Frederik Pohl drops in for a visit along with 10 other super storytellers. And much more! The staggering diversity of the book can really only be grasped by examining the contents, or better yet, the book itself.

Price is \$8.95 plus \$0.75 shipping and handling in the USA (\$9.70 total); outside USA, add \$1.00 (\$10.70 total). Individual orders must be prepaid. Creative Computing Press, Attn: Helen P.O. Box 789-M, Morristown, NJ 07960.

THE BEST OF BYTE — VOL. 1

The Best of Byte - Volume 1 is a 384-page blockbuster of a book which contains the majority of material from the first 12 issues of *Byte* magazine. 146 pages are devoted to "Hardware" and are crammed full of how-to articles on everything from TV displays to joysticks to cassette interfaces. The section on computer kits describes building 7 major kits. But hardware without software might as well be a boat anchor, so there are 125 pages of "Software and Applications" ranging from on-line debuggers to games to a complete small business accounting system. A section on "Theory" examines the how and why behind the circuits and programs, and a final section "Opinion" looks at where this explosive new hobby is heading.

The Best of Byte - Volume 1 is edited by Carl Helmers and David Ahl and published by Creative Computing Press. Price in the US is \$11.95 plus \$1.00 shipping and handling (\$12.95 total); foreign orders add \$1.00 (\$13.95 total). Orders from individuals must be prepaid. Creative Computing Press, Attn: Helen P.O. Box 789-M, Morristown, NJ 07960. Allow 8 weeks for delivery.

101 BASIC Computer Games is the most popular book of computer games in the world. Every program in the book has been thoroughly tested and appears with a complete listing, sample run, and descriptive write-up. All you need add is a BASIC-speaking computer and you're set to go.

101 BASIC Computer Games. Edited by David H. Ahl. 248 pages, 8 1/2 x 11 paperbound. \$7.50 plus 75¢ postage and handling (\$8.25 total) from Creative Computing, P.O. Box 789-M, Morristown, NJ 07960.

When you get your home or office computer, will you know what to do with it?

The typical home or small business computer system starts with a microcomputer, keyboard, cassette recorder, and TV set. From there you can add the peripherals, sensors, controllers, and other devices you need for your own special applications.

Creative Computing Magazine is dedicated to describing applications for home, school, and small business computers completely and pragmatically in non-technical language. You won't need a Ph.D in Computer Science, or a technical reference library, or a computer technician beside you to get these applications up and running. We give you complete hardware and software details. Typically, applications utilize commercially available systems. However, if an application needs a piece of home-brew hardware, we tell you how to build it. Or if it requires a combination of high-level and machine language code, we give you the entire listings along with the flowcharts and algorithms.

We also run no-nonsense reviews of computers (assembled and kits), peripherals, terminals, software, and books. We're frank and honest, even if it costs us an advertiser, which it occasionally has.

Here are just some of the applications you'll see fully described in future issues of *Creative Computing*.

Building Management and Control

1. Alarm monitoring/police notification
2. Environmental control (heating, air conditioning, humidification, dehumidification, air purity, etc.)
3. Fire and smoke detection
4. Appliance control (microwave oven, gas oven, refrigerator)
5. Perimeter system control (sprinklers, outdoor lights, gates)
6. Solar and/or auxiliary energy source control
7. Watering system control based on soil moisture
8. Fuel economizing systems
9. Maintenance alert system for household devices (key component sensing and periodic preventative maintenance)

Household Management

1. Address/telephone file
2. Investment analysis
3. Loan/annuity/interest calculations and analysis
4. Checkbook maintenance
5. Periodic comparisons of expenditures vs. budget
6. Monitor time and cost of telephone calls
7. Record incoming telephone calls and select appropriate response to caller
8. Recipe file
9. Diet/nutrition analysis
10. Menu planning
11. Pantry inventory/shopping list

Health Care

1. Medical/dental record keeping
2. Insurance claim processing
3. Health maintenance instrumentation control (EKG, blood chemical analysis, diet analysis, self-diagnosis)

Education and Training

1. Mathematics drill and practice
2. Problem solving techniques
3. Tutorial instruction in a given field
4. Simulation and gaming
5. Music instruction and training
6. Music composition and synthesis
7. Learning to program
8. Software development
9. Perception/response/manipulation skills improvement

Recreation and Leisure

1. Games, games, games
2. Puzzle solving
3. Animation/kinetic art
4. Sports simulations
5. Needlepoint/stitchery/weaving pattern generation
6. Computer art
7. Library cataloging (books, records, etc.)
8. Collection catalog/inventory/value (coins, stamps, shells, antique auto parts, comics, etc.)
9. Model railroad control
10. Amateur radio station control
11. Astronomy: star, planet, satellite tracking
12. Robotics
13. Speech recognition and synthesis

Business Functions

1. Small business accounting
2. Word processing/text editing
3. Customer files
4. Software development
5. Operations research
6. Scientific research
7. Computer conferencing
8. Telephone monitoring
9. Engineering calculations
10. Statistical analysis
11. Survey tabulation
12. Inventory control
13. Mailing lists

COMPUTER RAGE

2 to 4 Players - Ages 10 to Adult
A Product of Creative Computing Magazine

COMPUTER RAGE

©1977 by Creative Computing
P.O. Box 789-M, Morristown, N.J. 07960
Produced in Cooperation with Edmunds Corp.

COMPUTER RAGE is a fascinating new board game based on a large-scale multi-processing computer system. The object is to move your three programs from input to output. Moves are determined by the roll of 3 binary dice. Hazards include priority interrupts, program bugs, decision symbols which alter your path, power failures, and restricted use input and output channels. Notes are included for using

the game in school. Ages 10-adult; 2-4 players. **COMPUTER RAGE** comes with a colorful board, 12 program playing pieces, 3 binary dice, 38 interrupt cards. Orders must be prepaid. Only \$8.95 postpaid (\$10 outside of USA). Creative Computing, P.O. Box 789-M, Morristown, NJ 07960, Attn: Helen.

Outrageous T Shirts!

shirt.

T-Shirts available in adult sizes S, M, L, XL. All cotton, made in USA. \$4.50 each postpaid in USA, \$5.50 to foreign addresses. Send order (specifying design and size) with payments to Creative Computing, P.O. Box 789-M, Morristown, NJ 07960. Allow 8 weeks for delivery.

ARTIST AND COMPUTER is a unique new art book that covers a multitude of computer uses and the very latest techniques. In its pages, 35 artists who work with computers explain how the computer can be programmed either to actualize the artist's concept (such as the visualization of fabric before it is woven) or to produce finished pieces. Illustrated with more than 160 examples of computer art, 9 of them in full color. **ARTIST AND COMPUTER** will fascinate and inspire anyone who is interested in art or computer technology. Size 8 1/2" x 11"
